Family Resources Survey, 2018/19

The sample design in Northern Ireland..... 20
Data collection..... 21

Introduction

This note accompanies the main Family Resources Survey 2018/19 report which is available here:

Background

The Family Resources Survey (FRS) is a continuous survey which collects information on the income and circumstances of individuals living in a representative sample of private households in the United Kingdom. The survey has been running in

Uses of FRS Data

Family Resources Survey, 2018/19

The Department for Communities (Northern Ire A nd) uses the FRS to produce similar re orts to DWP, focused on Norther

Points to Note

- Self-employed respondents are asked questions on their most recent business accounts as submitted to HMRC ï dates of the accounts, profit or loss figures, tax and National Insurance amounts.
- They are then asked if they dra
