Background

•

Uses of FRS Data

The FRS is used extensively both within and outside DWP. The main uses are:

Households Below Average Income (HBAI)
This publication uses household disposable incomes, adjusted for household size

could hav4 impacted survey participation. Oth4r factors, such as p4rsonal restrictions, health, and attitudes to social int4raction may also hav4 influenced th4 amount and typ4 of data that th4 survey has b4en able to coll4ct.

This 4xtends to family formation, which is th4 k4y building block of FRS results. Coronavirus (COVID-19) restrictions may hav4 resulted in differences to previous surveys, as p4ople chose to form support bubbles with friends and family. This impli4s a reduction in hous4 sharing amongst unrelat4n adul(y)10(a)nd4nnv4 inis

Income and State Support

The FRS captured information about people on the Coronavirus Job Retention Scheme (CJRS) via a new set of interview questions.

employee ad cotribute to a employer scheme. These circumstaces are captured within the FRS tables uder the Self Employed Other category.

Savings and Investments

The FRS does notQq0.000008871 0 595.32 842.04 reWnBT/F1 12 Tf1 0 0 1 122.42 645.1 71.74 6 Liquid assets / Physical Wealth and pensions accruing are not included in FRS estimates. The survey also does not capture detailed informatio o expenditure (except for housing cost7). Therefore, it is not possible to 7how how household7 are coping finacially , in terms of income versus outgoings.

However, the FRS does capture informatio on liquid finacial assets, referred to in savings and investmets should be treated with cautio, as they are likely to be uder -estimates, since respodets often inaccuraf1 05y trepoirtte rcacc10(cu)-3(u)-3(ln-3(t)8(ed)-5(e)6(ta)-5(il)4(es)] TJETQ

where routing was decided by virtue of the respondent being State Pension age or

The FRS does not fully capture information on all types of income in kind accurately

Methodology

Population and sample selection

The FRS sample is designed to be representative of private households in the United Kingdom.

Data collection

received any contact details. The aim was to collect a phone number in person and make

Number of responses x median interview time

- adapting the question wording to avoid mentioning the showcard
- for most questions simply reading aloud all responses as listed on the showcard
-

and received. There were additions to the Employee Pay Details block to capture furlough in second jobs if the respondent had more than one job as an employee.

that for variables that are components of key derived variables, such as total household income and housing costs, and areas key to the work of DWP, such as benefit receipt, there should be no missing information in the final data.

It is not possible for interviewers to enter zero amounts where it is inappropriate to do

open up the rest of the s6quence. If the gat6keeper question is answered as 'don't know' or 'refused'

Points to note with imputed data

- Whilst several processes are used to impute

Grossing

Methodology Tables SE.1 to SE.9 provide standard er

Linking FRS data to administrative data

In line with the DWP Digital data strategy, the Department is committed to

It should also be noted that

- **Single male without children:** Benefit units containing a single male adult, headed by a non-pensioner, with no dependent children.
- **Single female without children**: Benefit units containing a single female adult, headed by a non-pensioner, with no dependent children.

Benefits

Financial support from the Government. Most of these benefits are administered by DWP. The majot[( )e3(y)] TJETQq0.00000[(,)] TJETQqesenment. Most with no dep y

Several respondents have more than one job. The FRS identifies which of these is

- Irish Traveller
- Mixed or Multiple ethnic groups
- Asian or Asian British
- Indian
- Pakistani
- Bangladeshi
- Chinese
- Any other Asian background
- Black or African or Caribbean or Black British
- Other ethnic group
